

# Your 2026 Foundation Formulary

Effective January 1, 2026

For the most current list of covered medications or if you have questions:

Call the number on your member ID card.

Visit your plan's website on your member ID card to:

- Find a participating retail pharmacy by ZIP code.
- Look up possible lower-cost medication alternatives.
- Compare medication pricing and options.

## Understanding your formulary

### What is a formulary?

A formulary is a list of prescribed medications or other pharmacy care products, services or supplies chosen for their safety, cost, and effectiveness. Medications are listed by categories or classes and are placed into cost levels known as tiers. It includes both brand and generic prescription medications.

To create the list, we are guided by the Pharmacy and Therapeutics Committee. This group of doctors, nurses, and pharmacists reviews which medications will be covered, how well the drugs work, and overall value. They also make sure there are safe and covered options.

### How do I use my formulary?

You and your doctor can use the formulary to help you choose the most cost-effective prescription medications. This guide tells you if a medication is generic or brand, and if special rules apply. Bring this list with you when you see your doctor. If your medication is not listed here, please visit your plan's member website or call the number on your member ID card.

### What are tiers?

Tiers are the different cost levels you pay for a medication. Each tier is assigned a cost, set by your employer or plan sponsor. This is how much you will pay when you fill a prescription.

### When does the formulary change?

- Medications may move to a lower tier at any time.
- Medications may move to a higher tier when a generic equal becomes available.
- Medications may move to a higher tier or be excluded from coverage on January 1 or July 1 of each year.

When a medication changes tiers, you may have to pay a different amount for that medication.

### Why are some medications excluded from coverage?

A medication may be excluded from coverage under your pharmacy benefit when it works the same as or similar to another prescription or over-the-counter (OTC) medication.

### What if I don't agree with a decision about an excluded medication?

You or your authorized representative and your doctor can ask for a coverage request by calling the number on your member ID card.

---

### About this formulary

Where differences between this formulary and your benefit plan exist, the benefit plan documents rule. This may not be a complete list of medications that are covered by your plan. Please review your benefit plan for full details.

---

### **What is the difference between brand-name and generic medications?**

Generic medications contain the same active ingredients (offer the same effect) as brand-name medications, but they often cost less. Once the patent for a brand-name medication ends, the FDA can approve a generic version with the same active ingredients.

### **What if my doctor writes a brand-name prescription?**

If your doctor gives you a prescription for a brand-name medication, ask if a generic or lower-cost option could be right for you. Generic medications are usually your lowest-cost option.

---

### **Over-the-counter medications**

An over-the-counter (OTC) medication may be the right treatment for some conditions. Talk to your doctor about available OTC options. Even though OTC medications may not be covered by your pharmacy benefit, they may cost less than a prescription medication.

---

### **What if I am taking a specialty medication?**

Specialty medications are used to treat complex conditions. These high-cost medications may be injected, infused or taken by mouth. Please note, not all specialty medications are listed in the formulary. Our specialty pharmacy can provide most of your specialty medications along with helpful programs and services.

# 2026 Amwins Foundation Formulary

| Coverage | Definition                              |
|----------|-----------------------------------------|
| Tier 1   | Low-Cost Products                       |
| Tier 2   | Preferred Products                      |
| Tier 3   | Non-Preferred Products                  |
| EX       | Excluded Drugs – 100% Patient Liability |

| Abbreviation | Program Name        | Definition                                                                                       |
|--------------|---------------------|--------------------------------------------------------------------------------------------------|
| PA           | Prior Authorization | Approval is required before your plan will cover this medication.                                |
| ST           | Step Therapy        | You must try a preferred treatment alternative before coverage is available for this medication. |

**Please Note:**

- *A list of Specialty Drugs can be found in Appendix 1. Specialty drugs may have to be filled at a Specialty Pharmacy, may require a higher copayment, and may be limited to a 30-day supply. Not all Specialty Drugs listed are covered by your plan.*

## AMWINS COMMERCIAL FORMULARY

The following is a list of the most commonly prescribed brand and generic medications. It represents the version of the drug list (formulary) that is at the core of your prescription drug benefit plan. The list is not all-inclusive and does not guarantee coverage. Some preferred medications overlap with other clinical programs and may not be covered. In addition to drugs on this list, the majority of generic medications are covered under your plan and you are encouraged to ask your doctor to prescribe generic drugs whenever appropriate.

*PLEASE NOTE: Preferred brand drugs may move to non-preferred status if a generic version becomes available during the year. Not all drugs listed are covered by all prescription-drug benefit programs. Certain utilization edits and criteria may apply. For specific questions about your coverage, please call the phone number printed on your member ID card.*

| Drug                                                                                                       | Brand Tier | Generic Tier | Notes |
