The presence of a prescription drug on the formulary does not guarantee that an insured will be prescribed that prescription drug by his or her prescribing provider for a specific medical condition. As required by law, the Company periodically updates the formulary with any changes. The notice may include a description of the types of changes and the date on which the changes are effective. Changes may include the addition or removal of a drug, dosage, or method of administration from the formulary. A change in tier placement also may occur, resulting in an increase or decrease in the indemnity benefit which could, in turn, impact cost-sharing for the insured. Due to the constant changes to the formulary, it is possible during a benefit period/plan year certain tiers may, or may not, have any drugs included within them. An example of a notice change occurs when a drug becomes available in generic form.

The formulary effective date is April 1, 2024. Formulary is subject to change at Amwins Rx sole discretion.

This drug list is the Commonly Prescribed Medications provided for ease of reference. It does not represent the full formulary. The indemnity benefit paid under your prescription drug insurance coverage underwritten by Fidelity Security Life Insurance Company® (the Company) is dependent on the placement of any medication on the full formulary and within a specific Tier.

Placement of a medication within a Tier depends on the title, dosage, method of administration, etc. The presence of a prescription drug on the Commonly Prescribed Medication List/full formulary does not guarantee that an insured will be prescribed that medication by his or her provider for a specific medical condition. The notice may include a description of the types of changes and the date on which the changes are effective. Changes may include the addition or removal of a drug, dosage, or method of administration from the formulary. A change in the Tier placement also may occur, resulting in an increase or decrease in the indemnity benefit which could, in turn, impact cost-sharing for the insured. Due to periodic changes to the formulary, it is possible during a benefit period/plan year certain tiers may, or may not, have any drugs included within them. An example of a notice change occurs when a drug becomes available in generic form. For the most current information on coverage of, and the benefit for, any medication including the applicable tier and anticipated indemnity benefit for that medication, the member should or contact AmWins RX at 877.248.5159.
